

COMPOSITIONS AND METHODS COMPRISING
PROTEIN ACTIVATED RECEPTOR ANTAGONISTS

ABSTRACT

5

Compositions and methods comprising protein
activated receptor antagonists are provided. More particularly,
the present invention relates to the use of proteins, peptides and
biomolecules that bind to protein activated receptor 2, and
inhibit the processes associated with the activation of that
receptor. More specifically, the present invention provides
novel compositions and methods for the treatment of disorders
and diseases such as those associated with abnormal cellular
proliferation, angiogenesis, inflammation and cancer.
